Your annual membership will be automatically renewed on its anniversary date. We will send you an email when it is renewed. To opt out call the Membership Department at 251-208-6880.

The Gulf Coast Exploreum proudly announces a new exhibition, *Genghis Khan: The Great Civilizer*, to be presented in Mobile, January to April 2019.

Genghis Khan will recreate the amazing life of the legendary leader and the nomadic horse culture of Mongolia. Guests will enter the tents, battlegrounds and market-places of this vanished world and explore Genghis Khan's life and those of his sons and grandsons during the rapid rise and decline of the Mongol Empire.

Visitors will learn the stories, see the treasures and explore the culture, conquests and heritage of Genghis Khan's 13th-century Mongol Empire and discover the man who first introduced the modern essentials of pants, paper money, forks, passports and much more.

Curated and developed by dinosaur expert Don Lessem, the exhibition features more than 300 spectacular objects on display, including rare and sophisticated weapons, costumes, jewels, ornaments, instruments and numerous other fascinating relics and elaborate artifacts from 13th-century Mongolia. "I went to Mongolia to look for fossils and discovered the truth about Genghis Khan, a civilizing genius," said Lessem. "It's a great story best told in a major exhibition."

Complementing the exhibition will be two IMAX films: *Pandas and Mysteries of China*. *Pandas* takes viewers around the world, from the China's Chengdu Research Base of Giant Panda Breeding, where panda Qian Qian is born, to the mountains of New Hampshire, where self-taught bear expert Ben Kilham raises orphaned black bear cubs. Narrator Kristin Bell says that the movie "...feels good! And the world is in need of more things that feel good," making it an ideal choice for family viewing. For the more intellectually inclined, *Mysteries of China* captures one of the great archaeological events of the modern age, telling the story of ancient China, the First Emperor, and the literal foundation of the China we know today. Through the lens of the discovery of the Terracotta Warriors and the Tomb of the First Emperor, viewers explore an ancient time when a fierce warrior brought together a warring nation and how this accidental discovery, made by farmers in 1974 in Xi'an, changed everything we know about China's past.

Genghis Khan

THE GREAT CIVILIZER
